

Application No. 10/762,669

AMENDMENTS TO THE SPECIFICATION:

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 7:

There is illustrated in copending U.S. Serial No. 10/369,816, entitled Photoconductive Imaging Members, filed February 19, 2003, now U.S. Patent 6,913,863, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member comprised of a hole blocking layer, a photogenerating layer, and a charge transport layer, and wherein the hole blocking layer is comprised of a metal oxide, and a mixture of a phenolic compound and a phenolic resin wherein the phenolic compound contains at least two phenolic groups.

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 15:

There is illustrated in copending U.S. Serial No. 10/370,186, entitled Photoconductive Imaging Members, filed February 19, 2003, now U.S. Publication No. 20040161683, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member comprised of a supporting substrate, a hole blocking layer thereover, a crosslinked photogenerating layer and a charge transport layer, and wherein the photogenerating layer is comprised of a photogenerating component and a vinyl chloride, allyl glycidyl ether, hydroxy containing polymer.

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 23:

There is illustrated in copending U.S. Serial No. 10/369,798, entitled Photoconductive Imaging Members, filed February 19, 2003, now U.S. Patent 6,875,548, the disclosure of which is totally incorporated herein by

Application No. 10/762,669

reference, a photoconductive imaging member comprised of an optional supporting substrate, a photogenerating layer, and a charge transport layer, and wherein the charge transport layer is comprised of a charge transport component and a polysiloxane.

Please substitute the following amended paragraph for the pending paragraph beginning on page 2, line 1:

There is illustrated in copending U.S. Serial No. 10/369,812, entitled Photoconductive Imaging Members, filed February 19, 2003, now U.S. Patent 6,824,940, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member containing a hole blocking layer, a photogenerating layer, a charge transport layer, and thereover an overcoat layer comprised of a polymer with a low dielectric constant and charge transport molecules.
